

Dear Dr. Supek,

Mark your calendars! The 3rd Annual Biophysics Week is March 12–16, 2018. Thank you for your past participation in this important week. With your help, this global event has been a huge success over the last two years. Let's build on the momentum and make Biophysics Week 2018 even better!

As you know, Biophysics Week is a global effort to raise awareness of the interdisciplinary field of biophysics, celebrate its accomplishments, and make connections within the community. Biophysics is the bridge between physical and life sciences and because of that powerful connection, the breadth of diversity in the field is tremendous. Biophysics is the one community that brings together chemists, biologists, physicists, bioengineers, and many others. It is important for everyone to share the vital work they do.

We encourage you to again join this global affair by hosting an event for Biophysics Week 2018. Events can include hosting a seminar, webinar, information session, lab tour, open house, or other activity during this week. The intent is to get out and share what you do with others in your community. Plan an event and inform the Biophysical Society to receive marketing and advertising support. The Society will advertise your event on its website, in member communications, and through social media. Plus, the Society can serve as a valuable resource for you during the planning process.

Don't miss this unique opportunity to give your institution and your field significantly greater visibility. The earlier you register, the more exposure your event will receive!

As an added bonus, organizers of events registered by January 15, 2018, will receive a free Biophysics Week t-shirt.

Get **Involved**. Plan an **Event**.
Register Your Event Now

Together, we can help celebrate biophysics and share with the world just how important it is!
