

## **Research associate position at Jožef Stefan Institute**

The theoretical biophysics group at the Department of Theoretical Physics, Jožef Stefan Institute, Ljubljana, Slovenia, is seeking a creative postdoctoral associate. The successful candidate is expected to expand the expertise of the group, which focuses on a range of topics in soft condensed matter and biophysics. The applicants should have a PhD in physics or a related area, a relevant postdoctoral experience, a proven track record of publications, a strong interest in soft condensed matter and/or biophysics as well as the ability and interest to pursue challenging, interdisciplinary research with good communication and organizational skills.

Jožef Stefan Institute ([www.ijs.si](http://www.ijs.si)) is the largest research organization in Slovenia. Soft condensed matter is among the main areas pursued at the Institute, engaging several experimental laboratories and theoretical groups in close collaboration with the Department of Physics and the Institute of Biophysics at the University of Ljubljana. The theoretical biophysics group is headed by Rudolf Podgornik and currently includes 6 senior researchers and several PhD students. The group offers a competitive scientific environment with strong international collaborations.

The salary will depend on the researcher's experience. The position is available immediately, i.e., from January 1 2019 on. The term of employment is 1 year. Please send the application including curriculum vitae, publication list, 3 letters of reference, and a statement of research interests to Primož Ziherl ([primoz.ziherl@ijs.si](mailto:primoz.ziherl@ijs.si)). Applications will be considered until the position is filled but candidates are encouraged to apply at their earliest convenience.
