

# BIOENERGETICS

A Bridge across Life and Universe

DAVOR JURETIĆ

CRC Press  
Taylor & Francis Group

December 2021: 7 x 10: 288pp  
27 illustrations

Hb: 978-0-815-38838-8 | £155.00  
eBook: 978-1-351-17276-9

## TABLE OF CONTENTS:

1. Mitchell's Chemiosmotic Theory: The Background 2. Membrane Bioenergetics in a Nutshell 3. Irreversible Thermodynamics and Coupled Biochemical Reactions 4. What is Life? 5. Some Answers to Schrödinger's Questions 6. Protonmotive Force 7. Membrane Proteins 8. The Maximum Entropy Production: Applications in the Bioenergetics of Bacterial Photosynthesis 9. Coupling Thermodynamics with Biological Evolution through Bioenergetics 10. Perfect Enzymes, According to Biochemists 11. ATP Synthase Molecular Motor 12. Bacteriorhodopsin: Light-harvesting Movie Star 13. The Protonmotive Force in Geochemistry and the Origin Question: Is the Origin of Bioenergetics Connected with the Origin of Life? 14. Integrating Glycolysis with Oxidative Phosphorylation by Hexokinases 15. Bioenergetics of the Brain, Aging, and Cancer Cells as Bridged by  $\alpha$ -synuclein 16. Retrospections, Contrasting Viewpoints, Incentives, Challenges, Prospects, and Conclusions

## Bioenergetics

A Bridge across Life and Universe

**Davor Juretic**

Bioenergetics deals with the very first energy transformation steps performed by living cells. Increased dissipation is the major effect of processing external energy packages. Enzyme-supported charge separation is the minor but essential outcome for maintaining life. These two events run together as driving-driven processes. The book explores the usefulness of dissecting the entropy production of enzymes involved in cellular defenses, fermentation, respiration, and photosynthesis, assuming that tightly regulated dissipation is the hallmark of life.
