SEMINAR ZAVODA ZA TEORIJSKU FIZIKU

(Zajednički seminari Zavoda za teorijsku fiziku,
Zavoda za eksperimentalnu fiziku IRB-a i Fizičkog odsjeka PMF-a)

Could known particle physics explain all issues of modern cosmology?

Michał Artymowski

Jagiellonian University, Krakow, Poland

Datum: četvrtak, 9. lipnja 2016.

Vrijeme : **14 sati c.t.**

Mjesto: IRB, dvorana krila Ivana Supeka

Abstract:

The cosmic inflation is well established theory of the early Universe, which predicts accelerated expansion of space around the GUT scale. Usually inflation requires a lot of physics beyond the standard model. In my talk I will present how to obtain cosmic inflation consistent with experimental data with minimal amount of physics beyond the Standard Model.
