Physical Review C

About *Physical Review C*

Physical Review C contains research articles reporting experimental and theoretical results in all aspects of nuclear physics, including the nucleon-nucleon interaction, few-body systems, nuclear structure, nuclear reactions, relativistic nuclear collisions, hadronic physics and QCD, electroweak interaction, symmetries, and nuclear astrophysics. More...

Physics: Exclusive pions

April 26, 2010

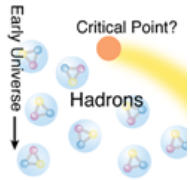

A theoretical model can now accurately explain pions produced by the scattering of electrons off nucleons over a wide energy range.
[Synopsis on Phys. Rev. C **81,** 045202 (2010)]

Physics: Taking the temperature of extreme matter

March 29, 2010

Researchers at the Relativistic Heavy Ion Collider have now measured the temperature of hot dense matter created in a nuclear collision.
[Viewpoint on Phys. Rev. C **81,** 034911 (2010)]
[Viewpoint on Phys. Rev. Lett. **104,** 132301 (2010)]

REVTeX 4.1 Update Released

March 15, 2010

A new release of REVTeX 4.1 has been released. This release addresses bugs in the initial release and offers improved handling of footnotes and bibliography entries and better compatibility with more packages. Please see http://authors.aps.org/revtex4/ for more information.

APS Announces 157 New *Outstanding Referees* for 2010

January 26, 2010

The editors of the APS journals have selected 157 new Outstanding Referees for 2010, out of more than 42,000 currently active referees. Initiated in 2008, the highly selective Outstanding Referee program recognizes scientists who have been exceptionally helpful in assessing manuscripts for publication in the APS journals. Selections are based on two decades of records on the number, quality, and timeliness of referee reports. The 2010 honorees come from 30 different

10 A microscopic estimate of the nuclear matter compressibility and symmetry energy in relativistic mean-field models

countries, with large contingents from the US, Germany, UK, Canada, and France. The decisions were difficult and there are many excellent referees who have yet to be recognized. By means of the program, APS expresses appreciation to all referees, whose efforts in peer review not only keep the standards of the journals at a high level, but in many cases also help authors to improve the quality and readability of their articles—even those that are not published by APS. For more information and a sortable listing of all Outstanding Referees, please visit http://publish.aps.org/OutstandingReferees.

APS Journals Come Home

January 4, 2010

As part of a new APS initiative all APS journal content from 1893 to present is now hosted on a single platform run by the APS Editorial Office. In addition, we have added new APS Journal accounts that will allow us to better integrate all APS services provided to readers, authors, referees, and members during the coming year while allowing users to have a more personalized view. This new foundation will allow APS to move quickly to introduce many new features across all of our web sites.

Physical Review Focus: The Nanostructure of Buildings and Bridges

May 7, 2010

X-ray studies reveal the nanocrystalline structure of the essential solid 'glue' in concrete.
