

Blic test 2 –  
titranja s vise  
stupnjeva slobode

P1. Koji od sustava na slici ima vise vlastitih frekvencija titranja? Opruge i zice su bezmasene.

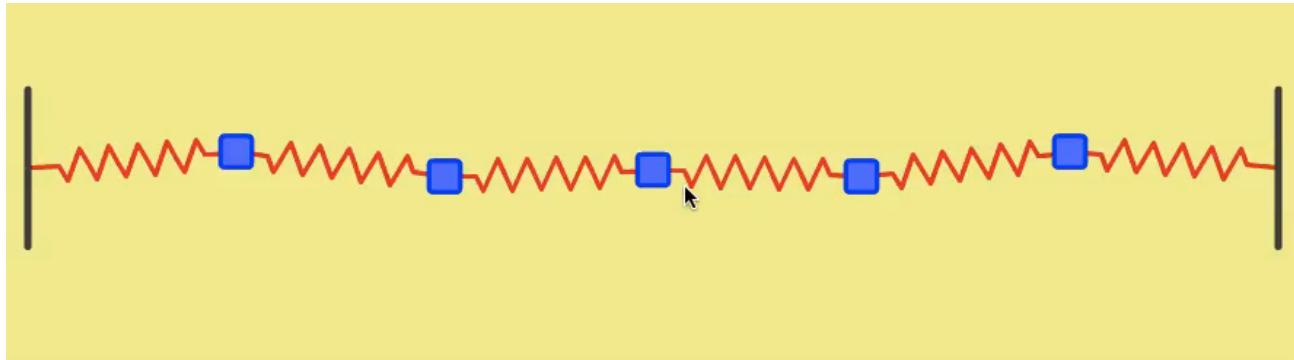

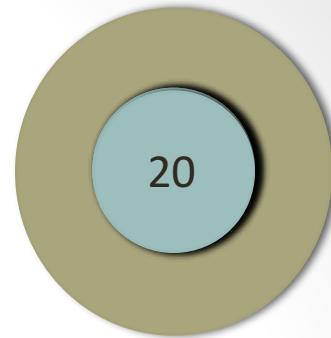

P1. Koji od sustava na slici ima vise vlastitih frekvencija titranja? Opruge i zice su bezmasene.

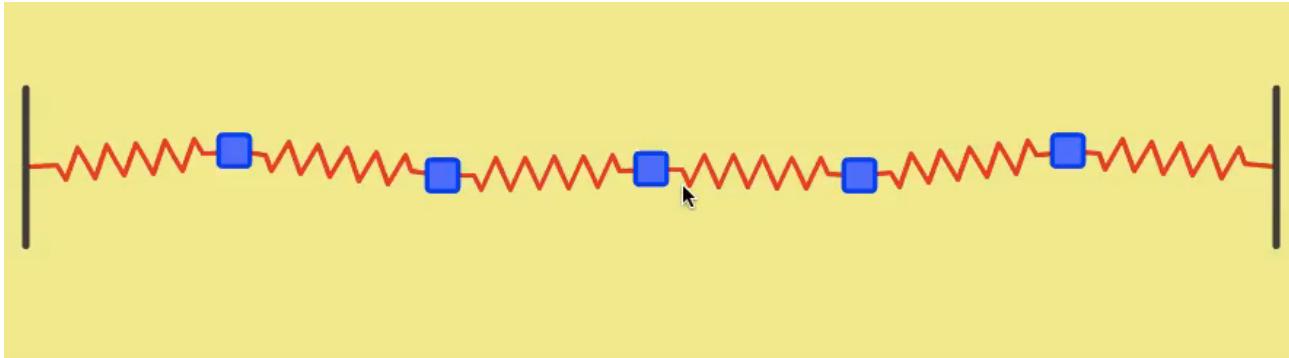

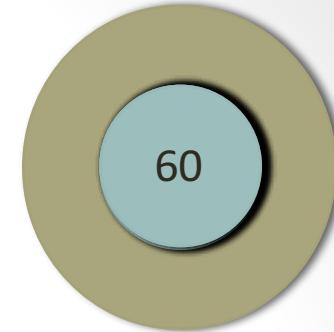

- a. (A)
- b. (B)
- c. Jednako.
- d. Ovisi jesu li sve opruge iste.
- e. Ovisi o tome postoji li gusenje.

P2. Titra li sustav na video u vlastitom modu?

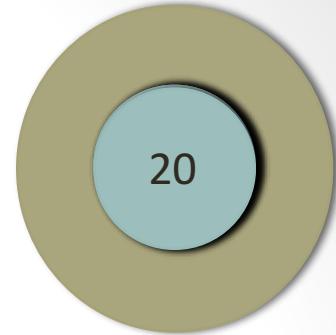

P2. Titra li sustav na videu u vlastitom modu?

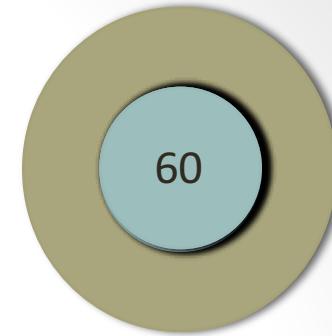

- a. Da, radi se o trećem transverzalnom modu.
- b. Da, jer se svako tijelo vrati na isti maksimum.
- c. Ne, jer se svako tijelo vrati na isti maksimum.
- d. Ne, jer su omjeri  $u_i/u_j$  funkcije vremena.
- e. Ne, jer je titranje i longitudinalno i transverzalno.

P3. Marko gleda sustav od 1000 masa vezanih oprugama kao kontinuiranu nit. Ana ga razmatra kao sustav masa. Sustav je pobudjen u 800-ti mod titranja. Tko predvidja visu frekvenciju titranja sustava?

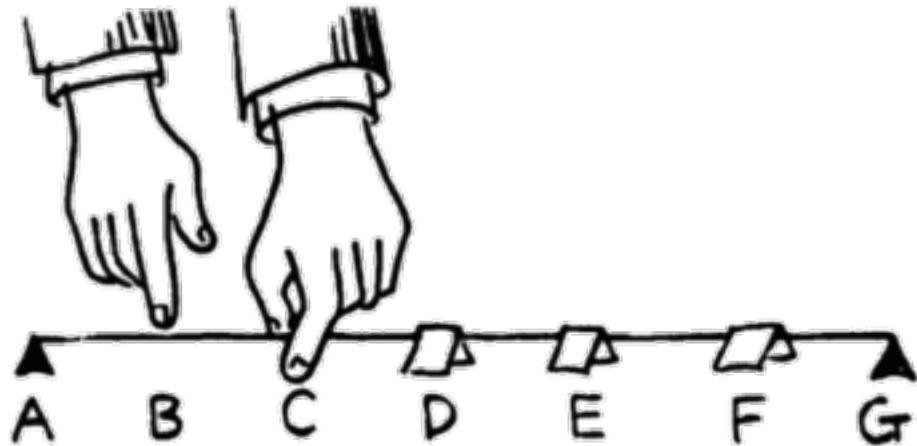

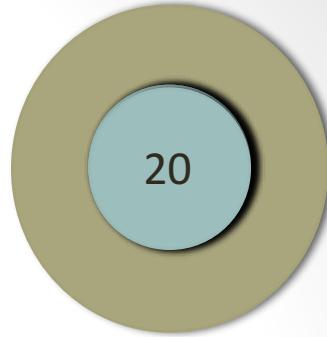

P3. Marko gleda sustav od 1000 masa vezanih oprugama kao kontinuiranu nit. Ana ga razmatra kao sustav masa. Sustav je pobudjen u 800-ti mod titranja. Tko predvidja visu frekvenciju titranja sustava?

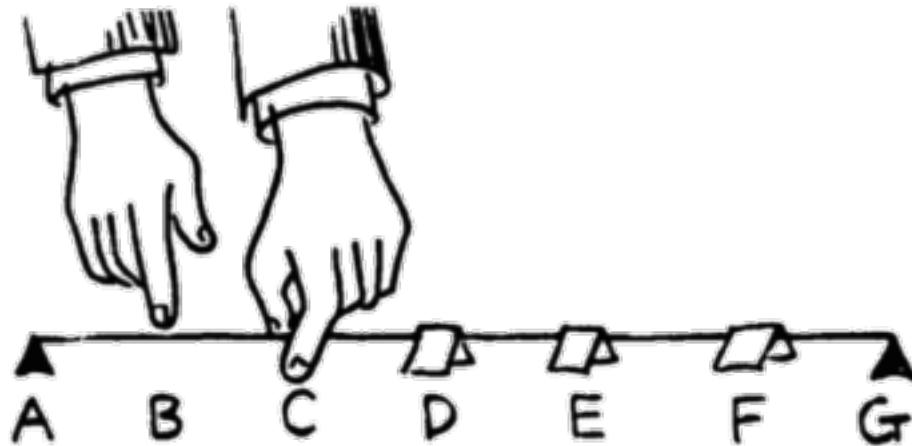

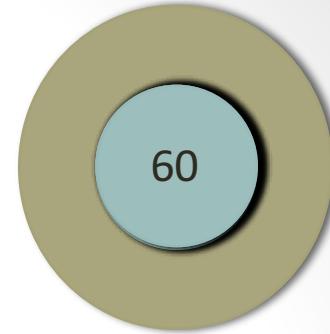

- a. Marko.
- b. Predvidjaju isto.
- c. Ana.
- d. Ovisi o ukupnoj duljini sustava.
- e. Ovisi o pocetnim uvjetima.

P4. Napeta nit na slici pridrzava se u tocki C. Tocka B prstom se odmakne iz ravnoteznog položaja. Sto se desi s papiricima?

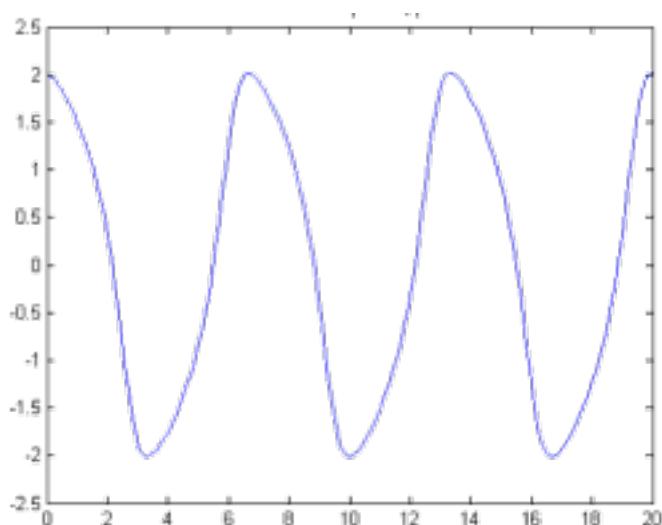

P4. Napeta nit na slici pridrzava se u tocki C. Tocka B prstom se odmakne iz ravnoteznog polojaja. Sto se desi s papiricima?

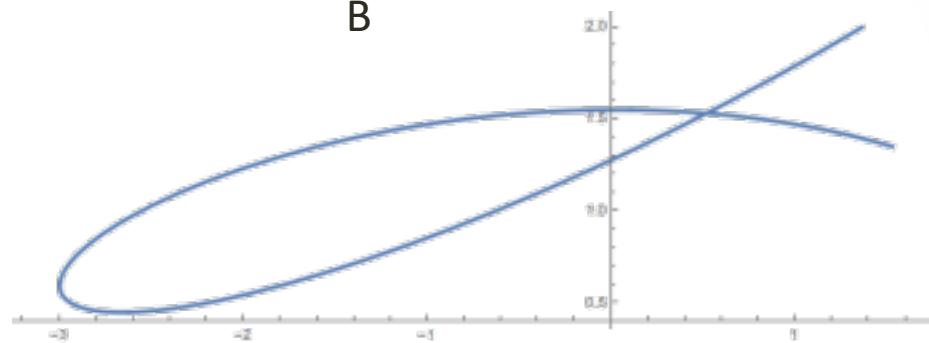

- a. Svi odskoce s niti.
- b. Ni jedan ne odskoci s niti.
- c. Samo papiric E odskoci.
- d. Papirici D i F odskoce.
- e. Papirici E i F odskoce.

P5. Poredajte po uspjesnosti opis krivulja na grafovima Fourierovim redovima.

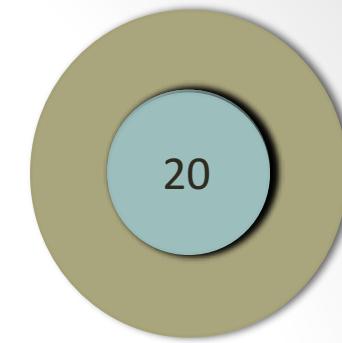

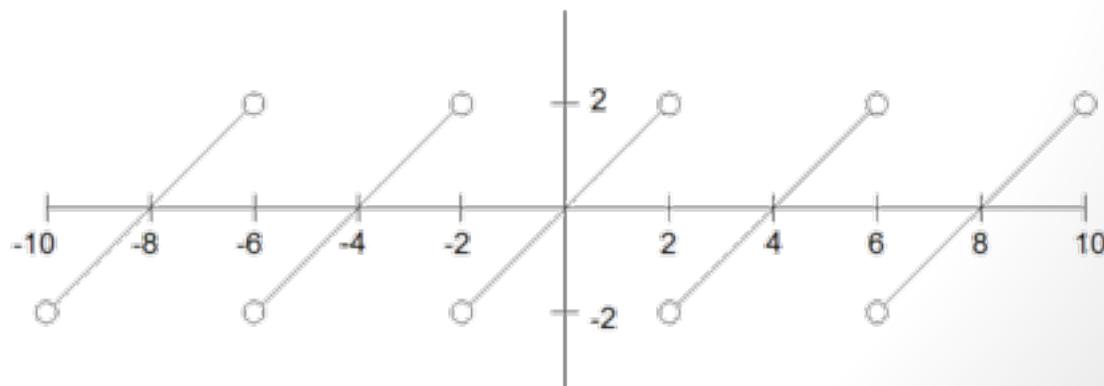

A

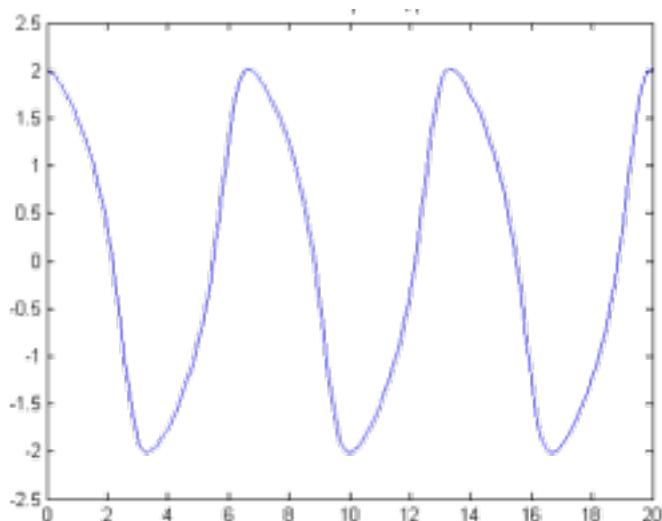

B

- a. B<C<A.
- b. C>A>B
- c. A=B=C
- d. A<C<B
- e. A>B>C.

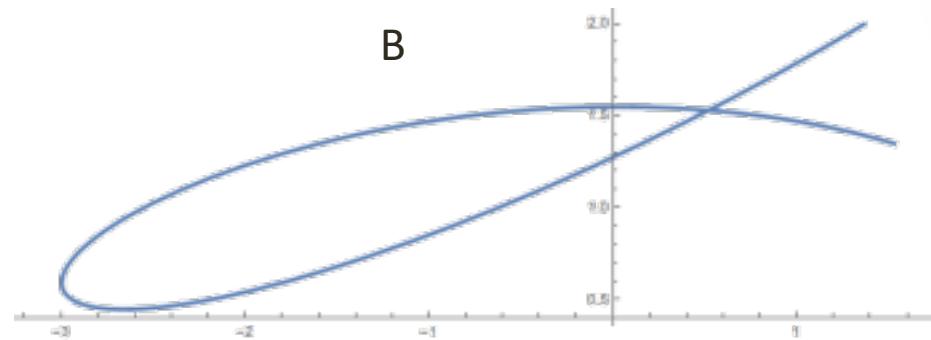

C

P5. Poredajte po uspjesnosti opis krivulja na grafovima Fourierovim redovima.

A

B

- a. B<C<A.
- b. C>A>B
- c. A=B=C
- d. A<C<B
- e. A>B>C.

C
